

BWC 10-Step Business Plan

RiskControl360° offers 10-Step Business Plan implementation services for employers of all sizes. The plan is a framework developed by the Ohio Bureau of Workers' Compensation (BWC) for businesses to use when implementing safety programs and developing a safety culture. The methodology involves integrating best practices, policies and procedures into the existing company business model. The intention is to establish these best practices for the purpose of reducing job-related injuries and illnesses, thereby reducing overall claims and premiums.

The steps of the program include:

1. Visible, active senior management leadership
2. Employee involvement and recognition
3. Medical treatment and return to work practices
4. Communication
5. Timely notification of claims
6. Safety and health process coordination and employer education
7. Written orientation and training plan
8. Written and communicated safe work practices
9. Written safety and health policy
10. Recordkeeping and data analysis

Although it can be used by any business to assist in reducing injuries, the BWC requires implementation of the 10-Step Business Plan for certain discount programs including:

- 100% EM Cap Program

For each of these programs, the steps required and implementation timeline vary. Associated program discounts and rebates also vary. RiskControl360° can assist with determining the program benefits associated with implementing the plan.

RiskControl360°'s experienced consultants will assist you in implementing this program in order for you to receive program rebates and/or discounts. In most cases our fee is offset by the discounts you will receive. In addition, a monthly report can be provided detailing the work performed, time spent and safety program performance.

Features & Benefits

- Customized programs
- Ease of implementation
- Quantified return-on-investment
- Frequency and severity tracking
- Fees that do not exceed discounts
- Liaison with the Ohio Bureau of Workers' Compensation
- Assistance with completing the required paperwork/reports
