

Technology (IS) Roundtable

February 8, 2011

Noon – 1:30 p.m.

Hilton Garden Inn, Levis
Commons

The Technology (formerly the Information Systems Roundtable) Series gives technology professionals the ability to converge and discuss current struggles, successes and ideas amongst peers in an informal atmosphere. The roundtable also serves as a networking opportunity for System Administrators, IS Managers and System Engineers. Discussions at the Technology Roundtable could help advance your organizations' technology, as well as give the participant the ability to stay up-to-date with new developments, processes, software and hardware. Participants come from a variety of organizations: profit, non-profit and government. This array of organizations allows for diverse insights, experiences and observations.

The Employers' Association believes in providing services in a timely manner and the Technology (IS) Roundtable Series is no different with prompt start and stop time – noon to 1:30 p.m. - **at various locations**. A facilitator keeps the discussion flowing and lunch is included in the series price.

Dates for 2011:

February 8

April 12

June 7

September 8

November 8

Business Process Alignment

- Reduce project risk
- Get more project funding
- Enable your business managers to self-manage their business process definition.
- Show them how to better manage their business processes
- Build stronger IT/Business Teaming Relationships

"Business Process Management tools are better and easier to use than ever before and it is now possible for business managers to take the lead on developing and maintaining both their current and future state business processes. This helps them to work with IT and it helps them to manage their IT projects and vendors. Learn how to empower your internal clients to self-manage their processes with a focus to communicating and improving the efficiency of their operations and reducing project risk. The real benefit is better communication, better projects and better IT."

Our Presenter:

Marty Rini is the current owner and President of Toledo Software. For much of his 30+ year career he has worked for computer and professional service firms including Digital Equipment, Inacom, Vanstar, Burroughs, Reynolds & Reynolds, Meritage and Conexio Services, providing both direct service to clients and management of projects and other consultants.

For the past 10 years, his primary focus has been on clients, markets, technologies and project services associated with business process workflow, software development, office automation, ERP, CRM, VoIP and IT operations.

As both a manager and individual contributor he still enjoys the excitement and hands-on experience of working with new software products that deliver business value and introducing new software ideas to others.
