

Technology (IS) Roundtable

April 12, 2011

Noon – 1:30 p.m.

Brandywine Country Club

The Technology (formerly the Information Systems Roundtable) Series gives technology professionals the ability to converge and discuss current struggles, successes and ideas amongst peers in an informal atmosphere. The roundtable also serves as a networking opportunity for System Administrators, IS Managers and System Engineers. Discussions at the Technology Roundtable could help advance your organizations' technology, as well as give the participant the ability to stay up-to-date with new developments, processes, software and hardware. Participants come from a variety of organizations: profit, non-profit and government. This array of organizations allows for diverse insights, experiences and observations.

The Employers' Association believes in providing services in a timely manner and the Technology (IS) Roundtable Series is no different with prompt start and stop time – noon to 1:30 p.m. - **at various locations**. A facilitator keeps the discussion flowing and lunch is included in the series price.

Dates for 2011:

February 8

April 12

June 7

September 8

November 8

Protect Your Data While Reducing IT Costs

“Identity Management for the Modern Enterprise.”

All firms manage the identity of their software users...the only question is whether they are doing it in a efficient and effective way or whether they are leaving the firm at financial and business risk via data breach by using error-prone costly methods that leaves corporate information open to tampering or theft while irritating end users at the same time.

Identity management is a discipline that deals with identifying individuals in a system (such as a network, or an enterprise) and controlling their access to data and software application resources within that system. It associates defined user rights and restrictions with the established identity of the person. Its purpose is to increase security and productivity, while decreasing cost and redundant effort.

Our Presenter:

Tranztec Solutions, Inc. was founded in 2001 as a full service technology consultancy originally founded to serve local industry in Northwest Ohio. They quickly grew to serve customers within 48 states of the continental U.S. as well as Canada.

With offices and data centers in Ohio, Michigan, Indiana, and Texas Tranztec has the knowledge, expertise, and coverage to provide services to a wide range of companies nationwide and has specialized expertise on topics of Identity Management, EDI Integration, Exchange Server, SQL, SharePoint, Document Management Imaging, and VoIP telephony and managed services.
